Personal Profile

Developed a keen interest in programming during my GCSEs. Attended university, where I honed my analytical skills and realized my true passion for programming, despite not studying it formally. Decided to leave university to pursue my passion for programming, dedicating myself to continuous learning and practical application in the field.

I have currently just learned HTML, JS, CSS, SQL, and Python through 12 weeks intensive bootcamp to help get me with the skills required to start in a role of a junior software developer. I have created a few project that highlight my programming skills such as building a file sorter based on file type and building an AI chatbot that takes in audio input and outputs the response in speech.

I want a stable job within a company that cares about their employee and provides me with an environment that allows me to work to my full potential and go beyond working with my colleagues. I plan on being an important employee within the company and gained more insight and experience within the development field in three years.

Education and IT Training

04/24-06/24	Just IT Training Ltd, London Digital Skills Bootcamp: Software Development
01/24-02/24	Just IT Training Ltd, London Level 2 Digital Skills Bootcamp
10/20-08/23	Edge Hill University, Ormskirk Certificate in Biology
09/16-08/20	Villiers High School, Southall, London
A Level:	BTEC Applied Science Level 3, Grade: MMM
GCSE:	5 A-C grades in subjects including Maths and English

IT Skills

Software Development Skills: Python, JS

Web Technology: HTML, CSS, JS

Core Programming Languages: Python, JS, SQL

Projects:

- **AI Chat Bot:** Developed using Python and OpenAI's API. Combines voice input with text-to-speech output, demonstrating integration of multiple functionalities.
- **File Sorter:** Automated file organization using Python's OS library. Categorizes and moves files based on type to enhance productivity.
- **Calculator:** Modular Python application. Implemented separate functions for operations (Addition, Multiplication, etc.) integrated into a main script.
- **Wordle clone:** Replicated the Wordle game using JavaScript and HTML. Implemented a streak counter using local storage and conditional statements.

Employment History

10/23-12/23

TRG Recruitment (WonderTree), Heathrow

Bartender

- Conducted quality checks and managed stock levels.
- Ensured timely and accurate service, contributing to positive customer experiences.
- Assisted waitstaff during busy periods to maintain efficient service.

07/21-07/21

GI Group, Southall

General Operative

- Met packing quotas in a team environment.
- Communicated and resolved issues to maintain quality standards.
- Took accountability for mistakes and ensured corrective actions.

Interests and Achievements

Computing: Troubleshooting IT issues for friends and family. Building projects like a file sorter and an AI chatbot. Currently learning Django for web development.

Hobbies: Gaming: Gaming, chess, word games (e.g., NYT games), reading, music, gym, programming.
