Personal Profile

Developed a keen interest in programming during my GCSEs. Attended university, where I honed my analytical skills and realized my true passion for programming, despite not studying it formally. Decided to leave university to pursue my passion for programming, dedicating myself to continuous learning and practical application in the field.

I have currently just learned HTML, JS, CSS, SQL and Python through 12 weeks intensive bootcamp to help get me with the skills required to start in a role of a junior software developer. I have created a few project that highlight my programming skills such as building a wordle clone or cloning the discord homepage using JavaScript, CSS and HTML.

I want a stable job within a company that cares about their employee and provides me with an environment that allows me to work to my full potential and go above and beyond working with my colleagues. I plan on being in a senior developer role within 3 years of working in the company.

Education and IT Training

04/24-06/24	Just IT Training Ltd, London Digital Skills Bootcamp: Software Development A twelve week intensive bootcamp covering the fundamentals of Web and Software development.
01/24-02/24	Just IT Training Ltd, London Level 2 Digital Skills Bootcamp A 4 week intensive bootcamp covering the fundamentals of Programming, Digital Marketing, Data analysis, Presentation and Cyber Security.
10/20-08/23	Edge Hill University, Ormskirk Certificate in Biology
09/16-08/20 A Level: GCSE:	Villiers High School, Southall, London BTEC Applied Science Level 3, Grade: MMM 5 A-C grades in subjects including Maths and English

IT Skills

Software Development Skills: Python, JS

Web Technology: HTML, CSS, JS

Core Programming Languages: Python, JS, SQL

Projects:

Wordle clone: I cloned the functionality of the wordle game using JS and HTML. One point i struggled with was the streak counter using local storage and overcame it by doing some more research into local storage and if statements.

Discord landing page Clone: I cloned the discord landing page using HTML and CSS. I struggled with the CSS of Margin and padding and overcame it with trial and error.

Employment History

10/23-12/23

TRG Recruitment (WonderTree), Heathrow

Bartender

- An example of when I showcased my management and organisational skill would be when I had to perform strict quality checks on the drinks we were serving ensuring they were as shown on the menu and doing stock checks
- Working in a bar i had to serve not only to the waiters but also to guests that were not served by the waiters on time to ensure that the company would not have a negative review.
- Being kind and respectful to every guest that I interacted with and ensured their needs were met such as giving them their orders or ensuring their drinks were enjoyable.
- My team consisted of one other bartender and the waiters who would serve drinks to the guests. I would sometimes take the drinks to the guests myself if i saw that the waiters are busy with other tables to ensure they did not get reprimanded.
- During shifts we would have multiple orders and would have to split the work between making coffees and drinks and I would be flexible enough to do both to ensure we were working at a pace fast enough to server the drinks within six minutes.
- As we had a certain amount of glasses and a few special glasses for special drinks I would have to go through the restaurant taking the glasses of empty tables and washing them in the dishwasher to ensure I could be ready to make the next few drinks.

07/21-07/21

GI Group, Southall

General Operative

- 2 Weeks Temporary job
- As a general operative I would have to meet the quota for packing the food items with a team.
- I would have to verbally communicate mistakes to the team so that they would be able to fix it.
- I would be working in a team of 5-8 on a conveyor belt.
- Masking mistakes and taking accountability for them and fixing them before they went to the next stage.
- I would ensure that food that didn't meet the standard was not packed and would report any issues to the manager.

Interests and Achievements

Computing: Troubleshooting IT issues for friends and family. Rooting old phones. Building projects like Wordle or cloning home pages using Python, JS, SQL, CSS and HTML. I am currently working on a Web based GYM APP that recommends gym workouts along images and video links to show how to do them.

Hobbies: Gaming, Chess, Word games such as the NYT games, Reading Manga, Music, Gym, Programming
